

Safety, Security, Health and Environment (SSHE) at ETH Zurich - Information for the new Doctoral Students at ETH Zurich

05.09.2024

Anne Katrin Thomas (SSHE Training and Communication)

As a matter of fact!

Safety, Security, Health and Environment is a concern for all of us!

Please have a look at:

www.sicherheit.ethz.ch

to get information on numerous safety and security aspects that you might have to deal with in the course of your time at ETH.

Classification of the most important information according to target groups

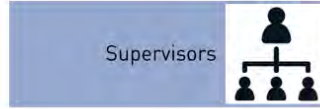

Main topics / needs

Courses and trainings

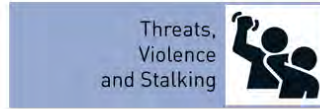

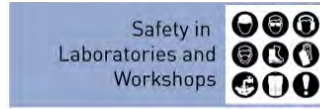

Dealing with emergencies

SSHE Services

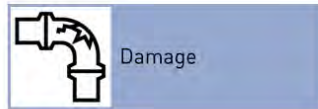

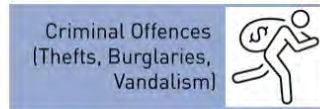

Information by User Group

Services, Advice, Course Program

Emergency, Incident

How do we make sure that all ETH members get the **basic information**?

- ⇒ After the **SSHE Training Concept** was accepted by the executive board, in January 2022, all ETH members now **complete a “Training module on the safety and security basics”**
- ⇒ You can work through the SSHE-slides “Safety and Security at ETH Zurich”.
- ⇒ The presentation is combined with a test.
- ⇒ A version for all ETH members is published (not the final version).
- ⇒ In the future will get an e-mail request to take note of the safety regulations at ETH Zurich.

Information on research areas that require **special safety and security measures** and knowledge:

- ⇒ **ETH members working in specific areas – for example in laboratories or workshops**
- ⇒ **check which safety and security requirements do exist – for example, biosafety, laser safety, chemical safety, ...**
- ⇒ Holders of special functions
- ⇒ Information for Employees / Technical and scientific staff
- ⇒ Consulting:
 - Group safety representatives of your unit
 - SSHE specialists
